Combination lock

BYO Device:

A good BYOD computer is one that

- **Has a Good Battery Life** - Students will want enough to get you through the day without needing to frequently charge their device. Having a charged computer is the number one challenge we see at the school that students are facing
- **An English Operating System** - Chrome OS, Windows 10 or MacOS are highly recommended
- **An Attached Keyboard** - Phones do not qualify for our BYOD and iPad's present some additional challenge so they must come with an Accessory Keyboard.
